GET DIGITAL

An online series on mHealth organised by the ECNP Digital Health Network

Digital approaches are fundamentally changing traditional ways of diagnosis, monitoring, management, and treatment of brain disorders worldwide.

The ECNP Network on ‘Digital Health Applied to the Clinical Research of Brain Disorders’ will offer online presentations on mHealth related research!

These online series aim at sharing and distributing new and high-quality research to researchers and clinicians, educating junior scientists across Europe, and foster collaborations across research groups.

There will be 30 minutes presentation of research findings followed by 15 minutes discussion and questions from the audience.

Location: online events organised on Zoom.

Dates in 2021

April 13th: Inez Myin-Germeys (KU Leuven, Belgium): Digital health: can it bring true person-centered care in psychiatry? (16:00-17:00 CEST)

May 11th: Ulrich Ebner-Priemer (KIT, Germany): Pitfalls and promises of real-time monitoring in mental disorders (16:00-17:00 CEST)

June 8th: Kate Saunders & George Gillett (University of Oxford, UK): Mobile phone communications as a marker of mood and anxiety (16:00-17:00 CEST)

September 14th: Maria Faurholt-Jepsen (University of Copenhagen, Denmark): Using voice features collected from smartphones to classify bipolar disorder (16:00-17:00 CEST)

October 12th: Heleen Riper & Arnout Smit (VU Amsterdam, The Netherlands): Predicting turning points in suicidal behaviour among depressed patients by EMA (16:00-17:00 CEST)

November 9th: Martien Kas (University of Groningen, Netherlands): Digital measures of daily social functioning across neuropsychiatric disorders. (16:00-17:00 CET)

December 14th: Tim Hahn (University of Münster, Germany): Network Control Theory and Attractor Models of Longitudinal Symptom Dynamics in Major Depressive Disorder (16:00-17:00 CET)

How to attend:

Please send an email to network_digitalhealth@ifss.kit.edu including your name and affiliations to receive the link and the password to attend the events.
